

DYNACAL™ FILM for illuminated signs

DYNACAL™ METALLIC

DCM001-TY (1,000mm×5m / 1,000×50m)

Metallic, Translucent
Formable
Higher outdoor durability

Day

Night

Metallic + Translucent

Thanks to its translucent properties, DYNACAL Metallic Film achieves a metallic look without any additional lighting, but becomes white when provided with backlight.

Formable

The film has optimum formability, ideal for plate molding with acryl, ABS, as well as other plastics.

Higher outdoor durability

In comparison to the competitor's products, which contain aluminum, DYNACAL utilizes a rare metal to achieve superior outdoor durability.
